[yadav-saurabh](#)

Full-stack developer with 8+ years of experience across SaaS products and startups. I've built and scaled applications end-to-end, from architecture and infrastructure to product delivery.

## Experience

### TRIPPL

Sep 2024 - Present

Senior Software Developer / Software Developer

Remote (AKL, NZ)

- Leading development of a fintech lending platform, building microservices with NestJS and integrating AI into the product.
- Set up and managed AWS and Azure infrastructure using Terraform, EKS, and ArgoCD.
- Built frontend with Vue and a white-label mobile app in Flutter.
- Integrated third-party services for payments, KYC, and open banking using event-driven patterns with Kafka.

### SELF EMPLOYED

Oct 2023 - Present

FreeLancer / Open Source Contributor

India

- Built and currently maintain [QrGrid](#), an [npm package](#) for customizable QR code generation, and previously maintained [agx-admin](#), a lightweight admin dashboard for internal projects..
- Contributed bug fixes and improvements to projects like [Bun.js](#) and [Elysia](#)
- Maintain a [personal portfolio](#) showcasing interactive 3D web projects and experiments.

### BHUMIO

Jun 2020 - Sep 2023 (3 yrs 4 mos)

Lead Full Stack Developer (Contract)

Remote (NY, USA)

- Led end-to-end development using **React**, **Node.js**, and **PostgreSQL**, ensuring scalable architecture.
- Managed **AWS infrastructure** with **Docker**, **Kubernetes**, and **Argo CD**, improving deployment efficiency.
- Set up **Grafana**, **Prometheus**, and **CloudWatch** for monitoring and alerting systems.

### MEMCORP

Oct 2018 - Apr 2020 (1 yrs 7 mos)

Full Stack Developer

Mumbai, India

- Developed cross-platform applications using **React**, **React Native**, and **Angular**.
- Built backend services in **Node.js** and **Express**, using **AWS S3** and **Docker** for deployment.
- Built a small Unity (C#) mobile demo game to prototype a gamified feature.

## Internship
